UOMi

UI Design Specification – Expense & Transaction Tracking App
Front-end team

Overview

UOMi is a mobile app that helps groups of people track shared expenses and see who owes whom. Users create groups (called **spaces**), add members by phone number, log expenses, and settle up. This document describes every screen in the app, what each one contains, and how the screens connect. The original whiteboard sketches are attached at the end for reference.

App Flow

Screen	Where it leads
Login Page	Entry point. After signing in, the user lands on the Home Page.
Home Page	Main dashboard. Leads to Create Group or an Existing Group.
Create Group	Group Name pop-up → Add People page → back to the group.
Existing Group	Opens the Group / Expenses page for that group.
Bottom navigation	From anywhere after login: Home, Notifications, Transactions, Profile.

Screen list

1. Login Page (with Create Account and Forgot Password)
2. Home Page (Main Dashboard)
3. Create Space – Group Name pop-up
4. Create Space – Add People page
5. Group Page
6. Profile Page
7. Notifications Page
8. Transactions Page

1. Login Page

The first screen the user sees. It shows the app name **UOMi** at the top and two options: **Create Account** and **Sign In**.

Create Account

Field	Details
Username	Must be unique. The username is required to reset the password, so it acts as the account's recovery key.
Name	The user's full name.
Phone number	Used by other people to find and add this user to groups.
Password	Password field.
Confirm password	Must match the password above.

Sign In

Field	Details
Username	Registered username.
Password	Account password.
Forgot password?	Link that opens the Forgot Password sub-page.

Forgot Password (sub-page)

1. The user enters their registered username.
2. If the username is correct, the user can set a new password (new password + confirm).

2. Home Page (Main Dashboard)

The main screen after login. Sections are listed from top to bottom.

Element	Details
Notifications	Heading with a small round badge showing the number of unread notifications (e.g. 10). Below it, a card shows the latest notification, for example *"You owe ₹14 to Swetha from this group"*, with two buttons: ✕ (reject) and ✓ (accept).
Create Space	Sits to the right of the Notifications card. A square card with a large "+" button. Tapping it starts creating a new group (see section 3).
Overall balance banner	A small banner that adds up the user's balance across all groups into one figure (e.g. "Overall: –₹0.14").
Groups	A list of the user's groups. Each group is a wide card split in two: **group name on the left**, and on the **right** the balance summary, e.g. "You owe ₹20" with the name of the person involved. Tapping a card opens the Group Page.
Bottom navigation bar	Four tabs, left to right: Home (house icon), Notifications (bell icon), Transactions, Profile. Shown on all main screens.

3. Create Space

Creating a group happens in two steps.

Step 1 – Group Name pop-up

Tapping “+” on the Home Page opens a pop-up card over the screen.

Element	Details
Group Name	Label and a text input box for the name of the group.
Icons	A row of icons below the input. The user picks one as the group’s icon.
Next button	Round button with a right arrow (→) at the bottom right of the card. Takes the user to the Add People page.

Step 2 – Add People page

A full page for adding members to the new group.

Element	Details
Header	Back arrow (←) on the left, followed by the group name entered in Step 1.
Search bar	Search icon with an input to find users by phone number or name.
Search result	Each matching user appears as a card with a profile icon and their name. Tapping it adds them to the group.
Members list	A numbered list of everyone added so far (1. X, 2. Y, 3. Z …), each in its own row.
Confirm button	Round ✓ button at the bottom right. Creates the group with the selected members.

4. Group Page

Opens when the user taps a group on the Home Page (or right after creating one).

Element	Details
Header	Group name on the left, profile / members icon on the right.
Balance	What the user owes in this group, e.g. “You owe: ₹100”.
Expenses	An “Expenses” heading followed by a list of all expenses in the group, one card per expense.

5. Profile Page

Opened from the Profile tab, the right-most icon in the bottom navigation bar.

Section	Details
Profile details	Round profile photo on the left. Beside it: Name, Phone number, Username.
Currency	Dropdown to choose the currency, e.g. ₹ India.
Notifications	On / Off toggle.
Theme	Toggle between dark (moon icon) and light (sun icon).
Logout	Button with a logout icon that signs the user out.

6. Notifications Page

Opened from the bell icon. Shows the full list of notifications, such as payment reminders and requests to accept or reject a settlement.

7. Transactions Page

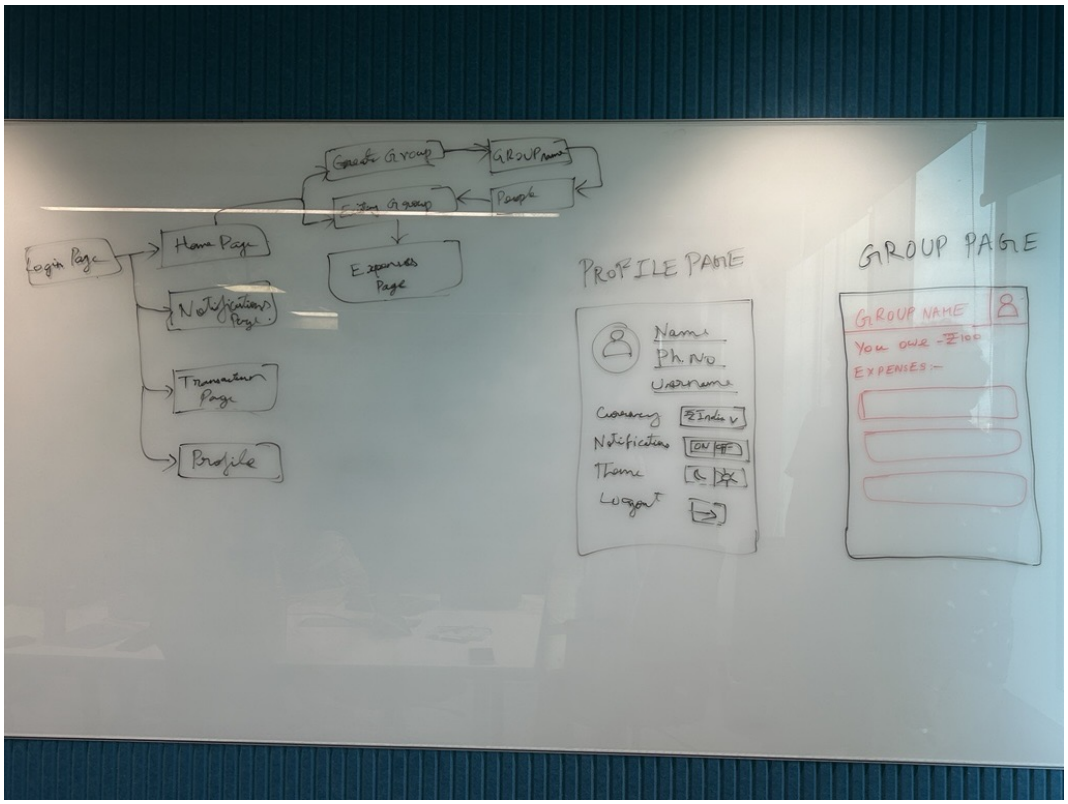

Opened from the Transactions tab. Shows the user’s transaction history across all groups.

> **Note:** The Notifications and Transactions pages are part of the app flow but their layouts have not been designed yet. They should follow the same visual style as the rest of the app.

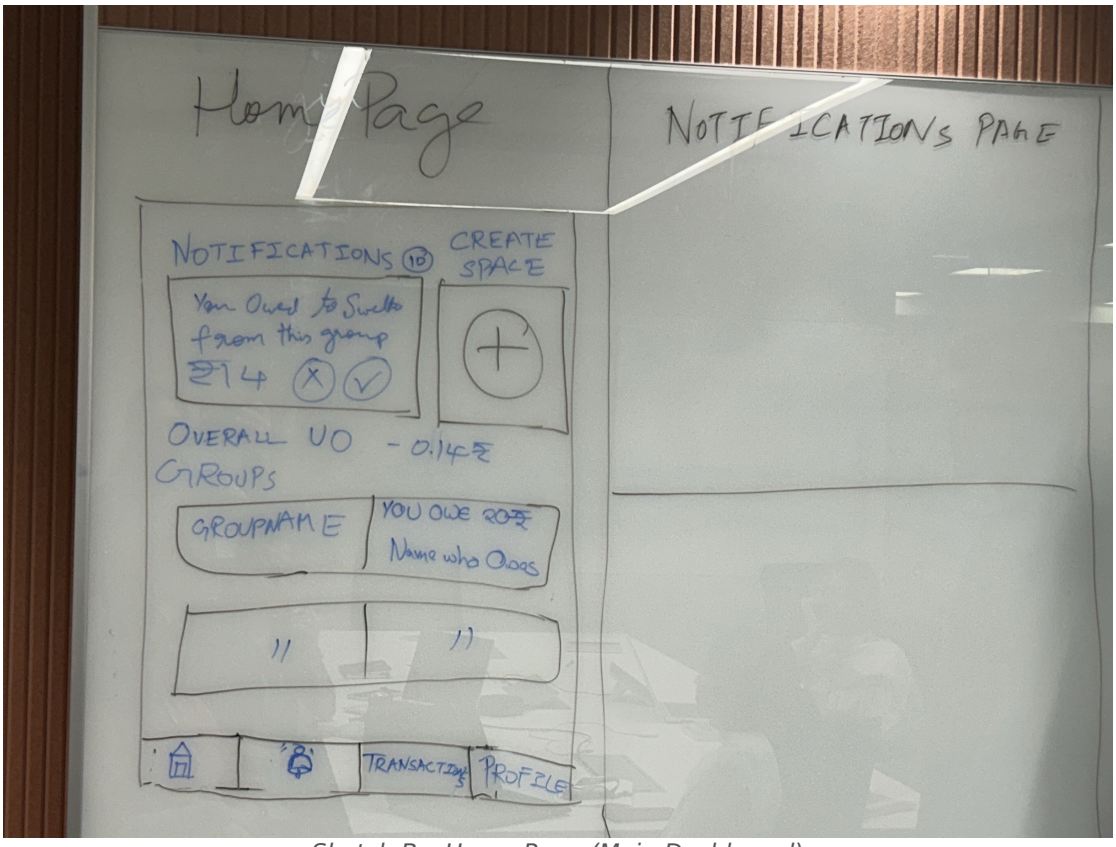

Design Notes

- The app is designed for mobile (portrait) screens.
- Amounts are shown in Indian Rupees (₹) by default; the user can change currency in Profile.
- Rounded cards are used throughout for notifications, groups, members and expenses.
- Primary actions (Next, Confirm) use round icon buttons placed at the bottom right.
- Both light and dark themes need to be supported.

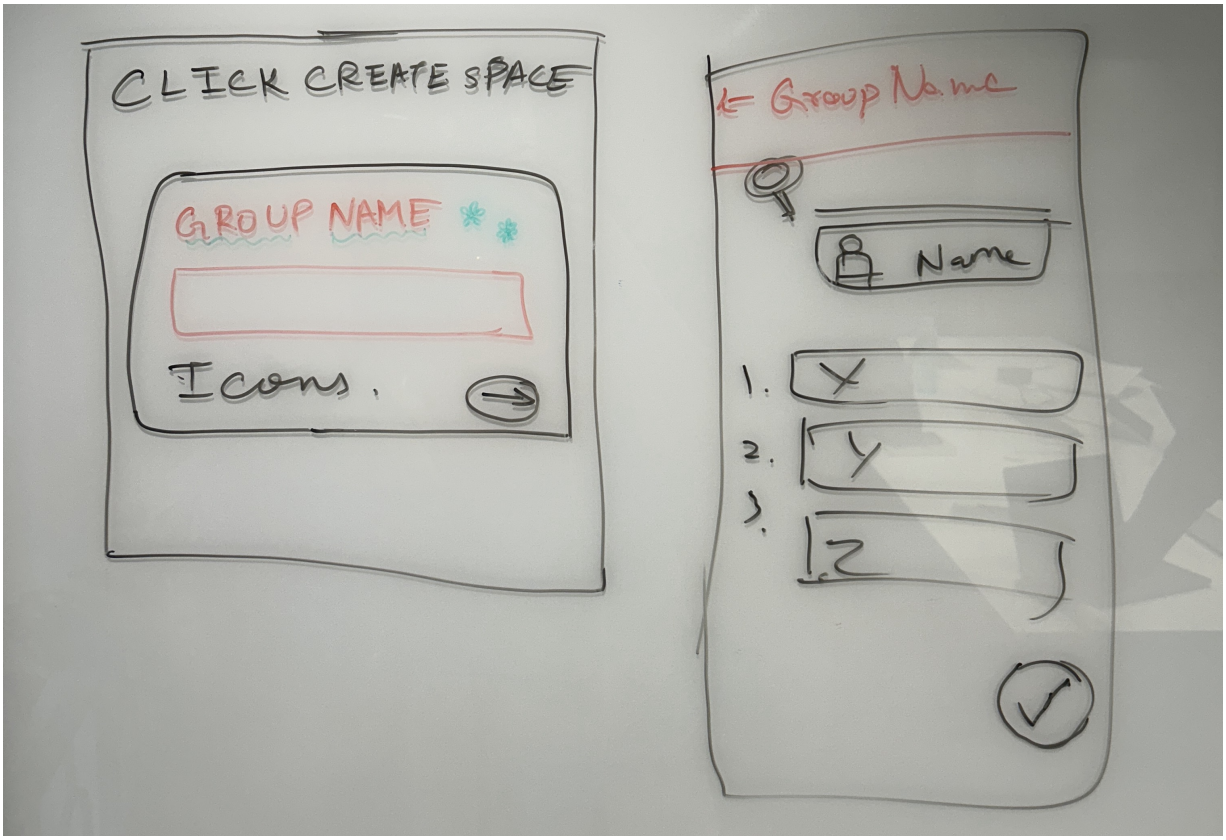

Appendix – Reference Sketches

Sketch A – App flow, Profile Page and Group Page

Sketch B – Home Page (Main Dashboard)

Sketch C – Create Space: Group Name pop-up and Add People page
